

About us: GSP Lab,Inc. is leading FISH probe manufacture company, based in Kanagawa, Japan. We are able to supply more than 300 kinds of FISH probes from our 200 thousands of BAC clones. Our FISH probes are widely used in research of oncology, prenatal genetic testing, and regenerative medicine (such as iPS cells).

5-Color FISH Probe
(CEN13q(TexRed),CEN16q(DEAC),
CEN18q(Cy5),CEN21q(FITC),CEN
22q(R6G)) (CM5002)

Our Products: Our FISH probes are made with high quality ingredients, which lead to clear signal with less background distraction. Our probes are very easy to use and hybridization time is as little as 4 hours*. Custom made FISH probe service is also available for your project needs.

*We suggest between 4 to 72 hours, depending on condition of sample.

Scientific Citations: Number of researchers are satisfied with our FISH probes. For more information, please click [here](#) to check the detail of our scientific citations.
